

Understanding the iShares MSCI EAFE ETF

When you purchase an annuity from MassMutual Ascend Life Insurance Company, you may have the opportunity to allocate funds to an indexed strategy linked to changes to the share price of the iShares MSCI EAFE Exchange Traded Fund (ETF).

The iShares MSCI EAFE ETF seeks to track the investment results of an index composed of equity securities issued by large- and mid-cap companies from developed markets outside of the U.S. and Canada. Those who invest in this ETF are often looking for international diversification and long-term growth.

About ETFs

An ETF is an exchange-traded fund that tracks an index, a basket of assets or a commodity. They are similar to mutual funds, but trade like a stock on an exchange. ETFs first began trading in the United States in January of 1993.

When you allocate funds to an indexed strategy linked to the iShares MSCI EAFE ETF, you are not investing directly in the ETF. Strategy returns may be significantly less than the changes in the closing price of the ETF. Limitations on strategy returns include caps, participation rates, vesting factors and daily value percentages. In addition, strategy returns reflect changes over terms, not over calendar years. ETF share prices do not reflect dividends paid by the fund.
