**TERMINAL
ILLNESS
WAIVER RIDER**

If the owner is diagnosed with a terminal illness, then after the first contract year up to 100% of the account value may be withdrawn without incurring an early withdrawal charge or MVA. The first diagnosis of terminal illness must be after the contract effective date. A terminal illness is defined as an illness having a prognosis of survival of 12 months or less, or any longer period as described in the rider.

This waiver may be used only once. Not available in Massachusetts.

**ACCOUNT
VALUE**

The account value is equal to 100% of all purchase payments received, plus interest credited daily, less any amounts withdrawn, including any applicable MVA or early withdrawal charges, less any applicable premium taxes and other taxes required by your state.

**SURRENDER
VALUE**

The surrender value is equal to the greater of 1) the guaranteed minimum surrender value (GMSV) or 2) the account value adjusted for any MVA that may apply on a surrender, minus any early withdrawal charge.

**GUARANTEED
MINIMUM
SURRENDER
VALUE (GMSV)**

The GMSV equals 87.5% of purchase payments minus all prior withdrawals (not including early withdrawal charges or negative MVAs) plus interest credited daily at the GMSV rate. The GMSV will not be less than the minimum values required by the NAIC Standard Nonforfeiture Law for Individual Deferred Annuities, model #805, and the GMSV rate will not be less than the minimum rate required by each state.

**MARKET VALUE
ADJUSTMENT
(MVA)**

During a term, an MVA will apply if the contract is surrendered or a withdrawal above the free withdrawal allowance is taken.

An MVA is an adjustment to the contract values based on the change in a market interest rate index since the start of the term. If the interest rate index has gone up, the adjustment will be negative and will decrease contract values. If the interest rate index has gone down, the adjustment will be positive and will increase contract values. The amount subject to the adjustment is the portion of the account value withdrawn after the 10% free withdrawal allowance, and includes the amount needed to pay any negative MVA and early withdrawal charge. This amount is then multiplied by the MVA factor.

A positive MVA will never be more than the early withdrawal charge that would apply to the withdrawal or surrender. A negative MVA, together with the early withdrawal charge, will never reduce the account value by more than an amount equal to two times that charge.

**EARLY
WITHDRAWAL
CHARGE**

During a term, an early withdrawal charge is applied to surrenders and withdrawals that exceed the free withdrawal allowance.

During a term, the following early withdrawal charge rates apply.

TERM YEAR	1	2	3
EARLY WITHDRAWAL CHARGE	8%	8%	7%

For this purpose, each term year ends on a contract anniversary.

**FREE
WITHDRAWAL
ALLOWANCE**

Before the first contract anniversary, up to 10% of all purchase payments may be withdrawn without incurring an MVA or early withdrawal charge.

After the first contract anniversary, up to 10% of the account value as of the most recent contract anniversary may be withdrawn without incurring an MVA or early withdrawal charge.

Cumulative withdrawals made in any year that exceed this 10% withdrawal allowance are subject to an MVA and early withdrawal charges. Unused portions of the free withdrawal allowance may not be carried over from one contract year to the next.

WITHDRAWALS

Withdrawals generally are allowed any time and are subject to IRS regulations.

Minimum withdrawal: \$500

Minimum account value following withdrawal: \$5,000

Any withdrawals received prior to age 59½ may be subject to restrictions and a 10% penalty tax.

DEATH BENEFIT

The death benefit amount is based on the greater of the account value or the GMSV. A death benefit is payable if the owner dies before annuitization or surrender. A spouse who is the surviving joint owner or sole surviving beneficiary may become the successor owner.

**PAYOUT
OPTIONS**

The following payout options are available: fixed period income, life income, life income with payments for at least a fixed period, and joint and one-half survivor income. The greater of the account value or the GMSV will be used to provide income benefit payments.
