## The role of renewal rates in long-term RILA performance

We know renewal rates matter. That's why we're committed to delivering long-term value over time – so you can help build long-term confidence in your client's investment approach.

Renewal rates – such as caps and upside participation rates – are reset at the end of each term and impact the growth potential of the strategy in future terms. While initial rates are important, understanding renewal rate behavior is essential to evaluating long-term RILA performance.

## How renewal rates work

A variety of factors can influence renewal rate decisions, including market volatility, the price and availability of hedging

instruments, interest rates, product design and overall approach to risk.

At MassMutual Ascend, renewal rates are set based on current market conditions and product terms – and we're focused on creating strategies that offer meaningful growth potential beyond the first year.

## Important reminders

Renewal rates can differ from initial rates and may vary from term to term. However, minimum guaranteed rates apply, and our downside protections do not change from term to term.

Past renewal rate performance is not a guarantee of future results – but it can help you set realistic expectations and have more informed conversations with clients.

## More than performance – backed by strength.

While many carriers offer a similar 10% Buffer indexed strategy on their RILAs, not all are backed by an A++ (Superior) rated company dedicated to maintaining the highest level of financial strength and stability.

At MassMutual Ascend, we're always in pursuit of better – and we'll continue to go above and beyond to deliver in a way that supports long-term confidence for both you and your clients.

<sup>1</sup>AM Best rating of "A++" (Superior) affirmed on October 23, 2025. AM Best rating of "A++" is the highest of 16 ratings. S&P rating of "AA" (Very Strong) upgraded on February 20, 2025. S&P rating of "AA" is the third highest of 21 ratings.

Caps and renewal rates shown are for purchase payments of \$100,000 and over. Information shown is not a guarantee or representation of future renewal or cap rate decisions. Future indexed strategies could offer different cap rate guarantees.
