MVA rates shown above. Rates and caps are current as of the date shown and are subject to change at any time.

To easily track the performance of our strategies' underlying indices using their ticker symbols visit US.SPIndices.com and search keyword: S&P 500: SPX, iShares U.S. MSCI EAFE ETF: EFA and SPDR Gold: GLD. SPDR Gold Shares refer to units of interest in an exchange traded fund that reflect the market value of gold bullion.

Interest rates for indexed strategies are determined, in part, by the change in the applicable index or unit value, and are limited by the applicable cap, but will never be lower than 0%. Indexed interest, if any, is credited at the end of each term year. If you allocate money to an indexed strategy, you aren't investing directly in any index or exchange-traded fund, the stocks included in any index, or the securities, commodities or other investments held in the portfolio of any exchange-traded fund. Withdrawals impact contract values. Taxable amounts withdrawn prior to age 59½ may be subject to a penalty tax in addition to ordinary income tax. If a waiver rider applies, early withdrawal charges are waived. Lifetime income payments are based on the account value.

Minimum Guarantees: The declared rate strategy will have a guaranteed minimum declared rate of 0.25% for contract duration. Point-to-point strategies with cap have a minimum cap guarantee of 2.40% for contract duration. Future indexed strategies could offer alternate options and rates. The guaranteed minimum surrender value (GMSV) equals 87.5% of purchase payments minus all prior withdrawals (not including early withdrawal charges or negative market value adjustments) plus interest credited daily at the GMSV rate of 2.40%. The GMSV will not be less than the minimum values required by the NAIC standard nonforfeiture law for individual deferred annuities, model #805 and the GMSV rate will not be less than the minimum rate required by each state.
