State Approvals and Variations: Index Summit 6 is not available in NY and OR.

Cap Control strategies consist of a series of six one-year terms made up of an initial term and five renewal terms during which the Cap Control guarantee will apply. We may set a different cap for each term, but we guarantee that the cap for a renewal term will remain within the Cap Control Range, which is the maximum amount that the cap for a renewal term may increase or decrease from the cap that we set for the initial term. Money allocated to a Cap Control Strategy may not be reallocated to a different strategy before the sixth contract anniversary.

Strategies with a 6-year Term and initial allocations to Cap Control strategies are only available for terms beginning in the first contract year, and strategies with a 3-year term are only available for terms beginning in the first four contract years.

Extended Care and Terminal Illness waivers not available in MA. Residents are only permitted to purchase annuity products within their resident state in MN and UT.

Declared rates and indexed strategy caps, upside participation rates, and trigger rates are current as of the date shown and are subject to change at any time. The Declared Rate Strategy will never be less than 2.40%. An indexed strategy's return is based, in part, on the change in the value of the applicable index or exchange-traded fund. For each indexed strategy that we currently offer, any positive return for a term is subject to the applicable cap, upside participation rate, or trigger rate for that term. These caps, upside participation rates, and trigger rates may vary from term to term. For current strategies, the cap for a term will never be less than 1%, the upside participation rate for a term will never be less than 5%, and the trigger rate for a term will never be lower than 1%. Future indexed strategies could offer different minimum caps, participation rates, and trigger rates. For each indexed strategy that we currently offer, any negative return for a term is limited by a 50% downside participation rate, a -10% or 0% floor, or a 10% or 20% buffer. Future indexed strategies could offer different downside participation rates, floors, and buffers.

Each indexed strategy provides returns based, in part, on the change in the price of a specific Index or ETF: the S&P 500® Index (SPX), the Russell 2000 Index (RTY), the iShares MSCI EAFE ETF (EFA), the iShares U.S. Real Estate ETF (IYR), or the SPDR Gold Shares ETF (GLD). The price change does not include dividends that might be paid on the underlying investments of the Index or ETF.
